-- to produce a blend of claim 1 --.

Authorization for this examiner's amendment was given in a telephone interview with Robert Stevenson on 2-19-04.

With regard to the newly cited prior art, the 2 newly cited patents are not closer to the instant claims than the art already of record and instant claims 1 and those dependent thereon are patentable over the these 2 patents since they do not teach or fairly suggest applicants component "i" having at least 5 weight percent combined methacrylic and acrylic acid. With regard to claim 7, these two patents do not teach or suggest a metallic pigmented blend.
